SUBJECT.

Works on the Manjarabad Ghaut

Indexed
D. Narasimha Rao

W D 88—GPB—50,000—24-7-18

Memorandum

With reference to the letter from the Superintt. of Ashtagram No. 60 without date, transmitting the General Estimate of Naramut works for the Current year Sourmeya 1849/50/ including Seringapatam/ amounting in the aggregate to C. Pagodas 55,550. 7–5¼, I beg to submit a Memorandum shewing the particulars of the works for which this amount is proposed to be laid out, and to state that a sum of C. Pags. 5,156–2–8 was included in the General Estimate of last year for the works on the Munjerabad Ghaut and according to the accounts received this sum has been expended, and another sum of C. Pags. 5,158-6–9 is again included in the present Estimate for the works on the same Ghaut – Thus there about half of

appears no limit to the expenditure on account of this Ghaut, and this point is submitted for the Commissioner's consideration.—

The Commissioner will also observe by the enclosed Memo. that works sanctioned in the last year and not executed, but which are to be completed in the present year amount to C. Rs. 32,613-9-7- and the amount proposed for sanction in this year is Rs. 19,736-0-12¾ I think that excepting the repairs of Tanks and Nullahs and all such other emergent works, the rest may be postponed until the works on hand shall have been executed—

No. 35 541

To

The Secretary to the Commissioner
for the Government of the Territories
of the Rajah of Mysore
Bangalore

Sir

I have the honor to forward for the Sanction of the Commissioner, a Statement of the Sums probably required for the Maramut Expences, of the Several Talooks of this Division during the current year..

2 The total amount it will be observed, is C. Pags 26240-11 8½, of which C. Pags 10583: 5: 5½ was Sanctioned last year, but not expended, and C. Ps 2713-9-3½ expended but not Sanctioned, being in part of the Estimates for the Puttun Astagram and Mysore Talooks, returned by you for correction with your letter of the 18th June last With regard to the Arrangement of this latter Sum, I had the honor of addressing the Commissioner on the 14th of November last

The

The actual Sum therefore requiring Sanction, in addition to that above mentioned as having been expended last year in anticipation of Sanction, in Puttum Astagram and Mysore on emergency, is C. Rs. 12,942-5-15½ Rupees C. Rs. 10,527-7-12¾ for the Annual Repair of Cuttahs and Water Courses, and C. Rs. 2414-6-2¾ for the restoration of a Cullah in the Mysore Taloot, and the repair of petty injuries to Tanks elsewhere.

The Cullah in the Mysore Taloot, which it is proposed to restore, is a continuation of that which lapses through the Heggadadevenestah Taloot, commencing at the Hunnagode Cuttah on the Lutchmun Teerd, and the object in view, is the irrigation of a very large tract of Paddy Land now in the hands of the Public Cattle Department, but which, it is anticipated on any future distribution of Grazing Lands, will be given up for cultivation.

5 A large Sum is entered as being required for the clearing out and repair of the Cullahs in the Taloot

Talook of Yadatora, but from personal
inspection I conceive it necessary, especially
with reference to the cultivation of Grazing
lands which it is to be hoped will
shortly be sanctioned. That portion of
the Tippoor Nullah also, situated in this
Talook, the annual repairs of which
have heretofore been included in the Estimates
of the Mysore Talook, has this year
been entered in the Estimates of this
Talook

6 The works in Nursipore have
been estimated for by the Maramut
Goomashtah and a Maistry of the
Division From the personal inspection
of the North and South Nullahs, I
can speak to the absolute necessity of
the repairs to these, applied for, and
I have reason to believe that the
remainder are equally necessary, as the
works of irregation in this Talook
have been badly mismanaged The
Estimates for Mysore and Puttun Astagrams
are very large, but as I have considerable
confidence in the Zeal and Judgement
of the present Amildars of those

Talooks

Talooks, and from what I have seen, how ill late works have been conducted, I do not conceive them to be exorbitant. The question of the Contract for Mud Work however, is still as it was, and unless Captain Green can supply Workmen cheaper, I doubt if it will be executed at a lower rate than 80 Yards the Pagoda.

7 It is my intention however positively to prohibit this year, the giving the Mud Work in Contract, and I trust that we shall at least thus secure the Satisfactory performance of what is done, whatever the Cost may be.

8 I would be obliged also by your bringing to the notice of the Commissioner, that it is said that, under the Administration of Pourneah, when the repairs of these Bullahs were effectually provided for, the Ryots of the Talooks were employed conducting them. Each House was obliged I am told, to furnish one Man daily, but he was not paid for his Labor.

Now it appears to me that, notwithstanding

notwithstanding the abolition of Bittee, this practice might most justly and usefully be reverted to, always of course providing that every man employed, get a fair remuneration, calculated according to the current price of labor.. It cannot I conceive, be considered a hardship, that the Ryots who benefit so largely by these channels of irregation should be obliged to assist in their repairs receiving wages for the same while it seems natural to suppose that if so employed, they would be anxious to execute their work efficiently, as well as expeditiously

Should the Commissioner conceive that this modified reversion to an old custom does not trench on those principles of free labor which he has been at such pains to establish, and diffuse throughout the County, and that the effects are likely to be beneficial I would request his permission to try it this year in the two Talooks I have alluded to.. It could be exploded, or generally adopted next year according to the result of the experiment

Superintendent

It will be observed that the present Statement does not include the new Works at Vulcaud, the Bowly Rullah &c. now in progress, under the Special Charge of the Superintendent of Ordnance.

Acting Executive Engineer

Acting Superintendent

Mb

No. 33. SL2

To

The Secretary to the Commissioner
for the Government of the Territories
of the Rajah of Mysore
Bangalore

Sir

I have the honor herewith to forward the General Estimate for Public Works to be executed in the Division this year, as well as the other Paramut Accounts called for in your Circular Letter No. 65 of the 14th December last.

2d. Referring to the 2nd Paragraph of your letter under reply, wherein 20000 Pags is stated as the maximum, which the financial state of the country will admit of being disbursed this year on the account of the Paramount of this Division, I am sorry to remark that, I have not been able to bring my Estimate any thing near within that sum the amount required to be expended having been so much swelled by the repairs required to the Madonmutty Cattah and Koonchumuttah, and the repairs of Nullahs in the Yadatoora and Mysore Talooks, which are necessary before much of the

the fine Grazing land lately resumed for Revenue purposes, can be brought under cultivation.

3d. I would also beg to state that it is most likely, as the year advances and the Cutcherry takes thro' the Talooks, that many necessary Small repairs, not noticed in the present Estimate, may be brought to light, and to these I would request permission to give or Solicit the usual Sanction, provided the whole Amount expended during the year, does not exceed that now applied for viz^t. Rup^s. 30320-4-14. For, tho' no effort will be Spared to execute all the works entered in this Estimate within the Year, yet it is most likely, from the habitual lazines of the Public Servants in Peramit Matters, and from other Causes, that a portion will be left unfinished.

I have the honor to be
Sir
Your Most obed^t Servant

Answered 3rd March

N. 74 - 513

To

The Secretary to the Commissioner
for the Government of the Territories
of the Rajah of Mysore
Bangalore

Sir.

I have the honor to state for the information of the Commissioner that I have within the last few days, had an opportunity of visiting the trace in progress along the new line of Ghaut, proposed by Captain Green to connect Bullum with Canara

2. It appears that Captain Green formerly intended to carry his line along the left bank of the Yettin Hullah as far as Alvully 2 Miles beyond which he crossed it following the track of an old road that formerly existed This track took him for about 8 Miles along the right bank, after which he recrossed to the left just where Mysore and Canara meet

This line though practicable

and

and apparently less difficult, than many of the other lines of Ghaut which I have seen in this part of the Country, had yet many disadvantages; not the least of which, were the five large Bridges which, to make the road complete, it would have been necessary to throw across the Yellum Nullah.. Hopefully however, it occurred to Captain Green to try a line commencing & continuing on the right bank, and this he considers, has equalled his most sanguine expectations..

4 A trace, or track of about 2½ feet wide, commencing at the Village of Allamhully which, tho' some distance from, and considerably lower than Munyerabad, may be considered the head of the Ghaut, has been already completed for five or Six Miles through an open Country, the Slope of which is scarcely perceptible; At four Miles farther, should this 'track' be carried on, it would meet that part of the River, at which, had the old line been already been adhered to, there must have been a bridge, which is now avoided..

5 Some Jungle and Stone occur in this latter part, but that the difficulties

are

Richardson

acting Superintendent

are comparatively trifling, may be gathered from our party having cut their way through it, in a very short time, although accompanied by Several Horses, a good many Ponies, a loaded Bullock and a Tabukeen besides Coolies carrying Tents, Cots and Baggage

6 From the point above indicated to the end of the Mysore Boundary, the line assimilates with that formerly proposed, being about 8 Miles along the River Side. A Small portion of this road is open and level, but there is Jungle, the greater part of the way, and here and there a good deal of Stone, but the former is not very heavy, and the present track Shews the latter is by no means formidable.

7 At the Mysore Boundary, I crossed to the left Bank of the River, and followed the first proposed line not having time to explore the new track any farther but from the observations I was able to make it appeared that besides the necessity of a bridge being dispensed with the right bank afforded many advantages as compared with the left, which certainly for three Miles from the River is very difficult from the frequent undulations, and the many rocky beds of

of Mountain Streams that are met with:-

8 ally, object in addressing you on the Subject of this Work, is not so much with the view of calling attention to the general advantages that must accrue to this Division, from having a Viaduct, intermediate to those of the Dunsfyre and Avgoomby, as respectfully to point out to the Commissioner, the great benefit which the Major part of the proposed line will be to Bullum as a Means of internal Communication.

9 At present, a Gulph intervenes between the Villages to the North and West of the Yetton Hullah, and the remainder of the Tabock, and great difficulty is experienced in transporting Grain and other Articles of Commerce, to and from, the Villages in the Valley of this River..

10 The proposed line offers considerably to remedy these inconveniencies, as well as to open this fertile part of the Country to external traffic and when it is considered, how large a Revenue is annually derived from the Railroad at a small expense of collection, and almost none of Claraunt Works, it may perhaps appear that its Population have some claim on the Government for at least

one

one central road, practicable for wheel Carriage which, at present they have not for five Miles together, within an extent of upwards certainly of 5,00 Square Miles.

11 Believing therefore that, independant of more enlarged considerations, the local call for increased facility of intercourse is urgent and the claims of the people on the liberality of Government considerable, and that the line of Ghaut now inspected by Captain Green offers as far as can yet be seen, to facilitate to the utmost that can be expected from any single work, the internal Communication of this part of the Country, while for purposes of external commerce, it promises greater Advantages at a less expence than does any other line, that could be carried from the District. They respectfully recommend to the Commissioner that the Experimental trace now in progress be prosecuted with all possible Speed and vigor.

12 To admit of this, it will be necessary to place forthwith at the disposal of Captain Green, one Hundred Coolies with Tools as noted in the enclosed Memo; and with these under the Superintendence of the Small Detachment

of

of Sappers now at the Ghaut, and the general directions of Captain Green, I conceive enough may be done within the next 3 months, fully to test the Merits of the line, and afford Data on which to found a correct Estimate of the expense of the Work, if eventually undertaken..

13 In the mean time, even if the line should on further examination, fail to realize its early promise, the Money expended will not be altogether in vain, for the greater part of track to be made, will be useful to the people as a Bullock path..

14- It may not be out of place to remark, that a Sum of 3,000 Rupees has, it is believed, been already Sanctioned by the Madras Board of Revenue, for tracing the road from the Mysore Boundary to Buntwall..

2. Copies of this communication and of the Extracts referred to, will be forwarded to the Commissioner in Mysore, who have local knowledge and experience will enable him to place the Government of Fort St George in possession of the information on the points upon which the Honble Court require a Report.

I have &c

For Fort William } (Sd) J. C. Brooks,
the 27 July 1842 } Offg Secy to the Govt of India

Extract from a Letter No 6 of 1842 from the Honble the Court of Directors in the Public Department dated the 22 March

Soliciting the Court to sanction the construction of a Military & Commercial Road between Bangalore and Mangalore across a newly discovered & favorable pass in the Ghauts near Manjerabad in Mysore, at an expense, for the pass, of R. 67600, for the road between Mangalore and the Ghauts in the British Territories of R. 24000, & between the Ghauts and Bangalore chiefly in the Mysore Territory of R. 29000, of which it is proposed that the British & Mysore Govts shall defray the cost of the portions in their respective Territories —

Para 137 From your Marine Letter of the 13th July 1840, and that of Madras Revenue Secretary Letters of the 18th Octr 1837 & 18th Jany No 21 1840, we learn that the Madras Govt had expended R. 189,070, and had resolved to expend R. 66,000, more in the formation of a road over a pass in

in the Ghauts at Mercara and Coorg to the Sea Coast at Mangalore; you Concur with the Madras Govt in the importance of the undertaking, but noticed that the amount in question was considerably ---- within the limits which we have fixed for works undertaken without our sanction.

138. In our Revenue Despatch to Fort St George of the 31st July No 10 of 1840, paras 45 to 51 we expressed our disapprobation of this unauthorized expenditure, and of the delay of nearly two years in reporting the commencement of the work, Concurring however in opinion with you, regarding the importance of the road for Military Political and Commercial purposes, we gave our sanction to the additional (and unauthorized) expenditure

139. In your Political Letter of the 10th Jan.y 1840 you transmit a strong recommendation & proposal of the Madras Govt to form a road from Mungerabad in the Tullumb District of Mysore to the Coast at Mangalore over a recently discovered pass of the Ghauts which was considered better than any other between the Upper and Lower Countries

140. These two lines of road are

such

each recommended as becoming the shortest route for the transit of troops & artillery between Bangalore & the coast at Mangalore & for the general Political & Commercial interests of the country. They cross the Ghauts at no great distance from each other & yet one find no reference made to the one in the proceedings relating to the other.

141 It is obvious that two contiguous roads cannot be required for the military communication between Bangalore & the Coast at Mangalore. The utility of the road over the pass at Munjeeshad must be confined to Political & Commercial considerations & even in these respects the formation of the road at Meroor must render that of Munjeeshad less necessary. We do not doubt however that a second good road over a favorable pass in the Ghauts would still be of great advantage to the Coast and interior but we cannot sanction this second road until we are in possession of more detailed information respecting the Coast and the peculiar advantages that are expected from it.

142 As a general principle the expence of constructing roads should be defrayed by the States through which the—

the pass occasionally instances may occur in which a deviation from this principle is desirable, but we do not consider that an exception should be made in favour of the passage of the Ghauts.

-144- The necessity for the formation of the remainder of the line from Manjerabad direct to Bangalore is by no means evident. Altho' this direct line would be preferable for a Military Road, it is not considered so favorable for Commercial purposes while the termination of the road after the passage of the Ghauts would be accessible to the present roads of the Country. You have very properly called for further information from the Madras Govt. on this subject, and we must decline commencing a continuation of the road until we are better informed on the lines of communication in Mysore through which Country the proposed road from the Ghauts to Bangalore would almost entirely run.

144. We have sufficiently replied to the subjects of your Letter of the 15th July No 10 of 1840 paras 7 to 9 in our Revenue Despatch to the Govt of

Fort

Fort St. George of the 31st July c. No. 10 of

To

The Secretary to the Commissioner
for the Government of the Territories
of the Rajah of Mysore
Bangalore

Sir

I have the honor to submit
for the consideration of the Commissioner
Copy of the Correspondence noted in
the margin between the Superintendent
of Mar ut and myself on the
subject of a Road which he has Com-
-menced to trace, between Pallicum and
Sucklespoor

2. This Road is intended to
lead to the top of the proposed
Munjerabad Ghaut but is a
highly desirable work even if that
Ghaut should never be completed, as
there is now no bandy Road whatever
from Sucklespoor or indeed any other
part of the Munjerabad Taluk, over
which the produce of the Country can

travel

From the Superintendent of Mar ut
Dated 21st September 1842
To Do - - - Do - - -
Dated 8th October 1842
Do Do - - - Do - - -
Dated 13th Do Do

travel towards the interior. — The old Road from the Bushy Ghaut Certainly skirts the Saloak, but it is now almost abandoned, as being impracti= =cable for wheeled Carriages. —

3° Under the Sanction Con= tained in the 2nd Para of your letter No. 65 of the 26th March 1841, a sum of Rupees 1328-13-2. has been Expended on the trace of the new Ghaut, and a further Expenditure of Rupees 953-10-10. has been incurred by Captain Green on the trace of the Road to Sucklees= poor, under the impression it appears that that work was included in the Sanction, but as I am not Certain that this was intended by the Com= =missioner, I have desired to autho= =rize the disbursement, pending this Reference. — At the same time I beg strongly to recommend that it may be authorized, and that Captain Green be requested to send in an

Estimate

Estimate of the total amount that will be required to complete the Road

I have the honor to be

Mysore Maramut Office

To

The Superintendent

Attagram Division

Sir,

Sir

I have the honor to acknowledge the receipt of your letter dated 8th instant and to inform you that the trace from Sicklaspoor to Polinn is completed with the exception of 2 or 3 narrow paddy fields, which it is impossible to avoid but which being under cultivation have not been touched for the present. The trace I have not seen but it is said by a gentleman who has lately ridden along it to be all that can be desired, and that it is already made use of by travellers in preference to the old and more circuitous track. The distances as far as they have reached me and for which I am tolerably understood sanction had been before obtained will be seen from the accompanying account.—

I beg to add that about 6 miles of tracing from the frontier have yet to be done and that the present and ensuing season is the most favorable in my opinion—

Opinion for undertaking it

I have the honor to be Sir

No 86

To

Sl 11

The Secretary to the Commissioner
for the Govt. of the Territories
of the Rajah of Mysore
Bangalore.

Sir,

I have the honor to acknowledge the receipt of your letter No. 62 of the 25th Ultimo, conveying the Commissioner's sanction to the aggregate expenditure of Rupees 10453 on the road from Pollium to Sucklaspoor, in accordance with Captain Green's Estimate, and of your letter No. 52. of the 17th March last directing the employment of 100 Coolies on the trace of the Mungerabad Ghaut, from Sucklaspoor to the Canara frontiers with a view of completing it to the uniform breadth of 6 feet; and desiring at the same time that I should take measures for the effectual Superintendance of this work, I now beg to report that, I took advantage of being lately in the vecinity of Mungerabad to inspect, as far as my leisure would permit, the two new traces in question and I have proceeded over that portion

which

which lies between Pollium and about four Miles past Marnhully

2. It appears to me that nothing could possibly be better than the line of road marked out by Capt.n Green. I had already been over the greater part of it, two years ago, on which occasion I brought to the Commissioners notice the high opinion I had formed of it, not only as a medium of external traffic, but of internal intercourse; I can now only say that, my late visit has entirely confirmed my former opinion, and led me to expect that, the work when completed, will fully realize Capt.n Greens most sanguine expectation. —

3. Already is the line between Marnhully and Sucklas now traversed by foot passengers and single Bullocks carrying light loads, and the profile upon me that, when it is completed six feet along the whole line, it will immediately become the principal line of import for the salt consumers in the Northwestern parts of the — Division. ——

4. Having

4 Having when lately returning from leave of absence, ascended from Canara by the Bisly Ghaut, I can conscientiously speak of the present trace at Munjerabad being even now far preferable to it as a road for single Horsemen;- The Bisly Ghaut on its best days was unpracticable to the majority of Horses at any pace but a walk, but the Munjerabad trace even in its present imperfect state could, as far as I have seen, be traversed at a trot or canter.- The Bisly Ghaut is now only the ruin of its former self, and the road to it from Pollium is in many places impracticable for wheel carriages- on the other hand, the road from Pollium to Sucklaspoor though a mere trace only six feet wide, is passed over with considerable ease by a single loaded Bandy; indeed I met a Bullock bandy some way beyond Sucklaspoor close to the Fort of Munjerabad

5. Captain Green treats of the road from Sucklaspoor to Pollium, as a seperate work from the Ghaut,

and

and I certainly consider that a practicable Bandy road between these two Towns, is not only highly desirable but necessary even if the Ghaut should never be undertaken; But I confess it does appear to me that, to commence on a highly finished carriage road between these two places with expensive drains and Bridges, would scarcely be a prudent measure at present, or just to other parts of the Country, where similar works are needed, and where extensive traffic already exists.—

6. The road from Pollium to Sucklaspoor completed according to Capt.n Green's plan would certainly be a very pretty work, but with only a distant trace of Ghaut to the west of it, it may be doubted whether its utility would be commensurate with its Expence.—

7. To reach the nearest extremity of this, twelve miles of, Carriage, road, from Bangalore, it would be necessary to have Cover about one hundred and twenty miles of common, rugged country road, suitable only to the coarsest description of Vehicle, and upwards of half

that

that district of similar road must be traversed to reach it from Seringapatam.

8. That the work as estimated for by Captain Green may practically be necessary, is my earnest hope, and full expectation: but to render it so, the Ghaut must first be decided upon, as well as a similar road over the whole line from Bangalore & Seringapatam or both. —

To make this isolated piece of carriage road at an expence of 10,000 Rs. and leave the great Carriage road from Madras to Canarese incomplete, by the distance from Mysore to Bowly, when according to Lieut Francis' Memorandum it would cost only about 7,000 Rupees to complete it, would perhaps be hardly judicious I would therefore recommend that only so much of Capt^n Green's plan relative to the Pollicum road, be carried into effect at present as will render it perfectly impracticable for Bullock Bandies

10. To effect this I would suggest that 200 Coolies be employed in addition to the 100 sanctioned for the Ghaut, and that they be employed indiscriminately on the trace from the Canara boundary

to

to Pollium - Their whole efforts should at first be directed to the completion of the trace from Canara to Suckhaspoor - to 6 feet, before the rains set in; and subsequently, as the weather permits, to widen the road between Suckhaspoor and Pollium to 16 feet, and render it practicable and easy for that description of wheel Carriages for which alone, it can at present be required. -

11. During any periods previous to the completion of the works, in which it may be impossible to proceed with it, in consequence of the rains, I would strongly recommend that the Coolies be sent into the open Country to the eastward to work on the road between Pollium and Chunsoy patam, many parts of which require to be entirely re made, and on which the labour will be quite as valuable to the traffic of the Country, as on the specific road indicated. -

12. Should the views of the Commissioner in procuring an efficient superintendence of the Coolies, I beg to recommend that Mr Fredrick Green, who resides near Munjerabad,

may

may be employed on that duty, on a Salary of 70 Rupees a month. The interest which Mr Green must naturally take in the speedy and efficient progress of the work as well as his knowledge of the People in the neighbourhood & of their Language appear to point him out as especially adapted for the purpose required. I have ascertained that Mr Green is willing to undertake the Office, and to avoid delay I have requested him, pending the Commissioners' sanction, to assume charge of the 100 Coolies already sanctioned. —

13. In conclusion I would beg to remark that Captain Green's Estimate for the Pollicum road, was forwarded for Sanction during my absence, and before I had seen it. —

1 Ple

Mysore Commissr's Office

No. 76

To

5612

The Superintendent of the

Astagram Division.

Sir

I have the honor to acknowledge the receipt of your letter of the 6th. Instant No. 86 on the subject of the road from Pollium to Sukkaspoor, and the new trace of the Immyerabad Ghaut from Sukkaspoor to the Canara frontier, and am directed by the Commissioner to say in reply, that he is gratified to find that your former good opinion of the line of road marked out by Captain Green

is

is confirmed by your recent inspection of it..

2. The line between Mamulla and Sirkalapoor being already brought into use by foot Passengers and single loaded Bullocks is an earnest of the great advantage which will doubtless accrue to the Traffickers generally of this line, but especially to the Importers of salt into the North Western parts of Ashtagram..

3. Your personal experience of the superiority of the Immajeerabad trace even in its present imperfect unfinished state over that of the Bisly Ghaut is evidence of the judgment and penetration of the Projector of

of it, and is highly satisfactory in every way.

4. Concerning the piece of road between the town of Pollium and Sukleshpoor, I am desired to say, that the Commissioner having given your suggestions and reasons for them on this subject his consideration it occurs to him that this is an isolated piece of road of 12 Miles in length between two towns of no great importance, that to reach either end of it from any that is, it would be necessary to pass over, on the one side from Bangalore 120 Miles and on the other nearly half that distance from Seringapatam,

of

of common unmetalled road not
suited to Vehicles such as
would be benefited by a highly
finished carriage road, that
to make this piece of road of
any use, the Grant must be
decided on, as well as a si-
=milar road over the whole
line from Seringapatam or
Bengalore or both - that it
would now be of confined
and local utility which
would not be commensurate
with the outlay and therefore
not just to other parts of the
Country - as traffick already
existing should be provided
for in preference to anything
speculative, except when great
expectations of advantage

are well supported. That Captain Green considers this as a separate work..

5. For these reasons the Commissioner directs that the completion of this work be deferred for future consideration and in the meantime desires that agreeably to your proposals only so much of Captain Green's plan relative to this piece of road between Pollium and Sirkedpoor, shall be carried into effect at present as will render it perfectly practicable for Co Bullock Bemelies - For this purpose 200 Coolies are to be employed in addition to the 100 sanctioned for the Ghaut and

and employed as you suggest in your 10th Para:- The proposal contained in your 11th Para: for the employment of these Coolies during any periods previous to the completion of the work, in which the rains may hinder it, is approved of.

6. Your enlistment of Mr. Frederick Green's services for the efficient superintendence of the work, in anticipation of the Commissioner's orders, to prevent delay, is approved of, as is your proposal to secure that Gentleman's services to complete the work effectually, on a salary of 70 Rupees a

Month

Month. Mr. H. Green is ac-
-cordingly appointed to that
service on a salary of Rupees
70 a month, for such time,
as the work may be actually
carrying on.-

No 86 —

Nov 76

SL 13

To the Superintendent
Ordnance Office

Sir

I have the honor to acknowledge the receipt of your letter of the 6 instant No 86 on the subject of the wood from Pullum & Sublow Cove, and the new Lease of the Mangrove Island Shoal from Sublow Cove to the Caicos Jamaica, and am directed by the Commissioners to say in reply that he is gratified to find that your former good opinion of the Island of wood marked out by Captain Green, is confirmed by your recent inspection of it

2 The line between Inagua Gully and Sublow Cove being already kept into use by boat Lapsing and may be traded Bullocks

in the country of the great
advantage which will
be derived to the
Traffickers generally of
this Port especially
& the Inhabitants of both
the N. Western parts
of Hindostan —

Your personal experience
of the authenticity of the
Mungeerabad Accounts even in the present
state of the Duty Grant interfere unfavourably
with the prosperity of the
merit and demerits
of the Projects of it and
is highly satisfactory in
every way —

4th. Concerning the Price
of wood between Rubies
& Pattimore and such
Casport, I am advised
today, that the Commr
having given your very
serious and deserving
Item in this subject his
consideration, doeem

Chun: that Captain
Green considered this
a separate work that
that this is an artificial line
of road between two towns
of no great importance,
that to reach either one
of from any that is, it
would be necessary to take
one, on the one side from
Bangalore 120 miles, and
on the other nearly half
that distance from
Seringapatam, if
ing'ed road estimated to
vehicles such as would
be benefited by a lightly
finished carriage road.
that to make this line
of road of any use the Chun
must be decided on, as
well as a similar road
over the whole line from
Seringapatam to Banga
lore & both
that it would not be of
sufficient and local
utility which would not
be commensurate with
the outlay, and that
not just to other Districts of

112 miles in length

the country. ~~that~~ traffick
already existing should
be provided for in the progress
of any thing speculative,
except when great expec-
tation of advantage are
well supported.

That Captain Green
considers this as a
separate work -
5 For these reasons the
Commissioners ~~think~~
~~that~~ direct that this the consideration of
work be deferred for
future consideration,
and in the mean time
observe that agreeably
to your proposals, only
so much of Captain G's
plan relative to the dock
of war between Poltimore
and Sukkar-loor, shall
be carried into effect at present
as will render it der
gretly practicable for
Vessels of Burden

In this Increase 200 coolies are to be employed in addition to the 100 sanctioned for the Zhaute and employed as you suggest in your 10 Para. The Proposal contains your 11 Para. for the employment of these coolies during any Periods previous to the commencement of the work, as shall be allowed by

1866

6 your entitlement of Mr Frederick Greens services for the efficient superintendence of the work, as anticipated by the Commissioners orders & shall be allowed by, as in your Proposal to secure that Gentlemens services to complete the work effectually, on a Salary of 70 Rs a month by

and Jno L Green is
according & appointed
to that service on a salary
Rs 70 a month for
such time as the work
may be actually carrying

№ 149

Mysore Maramut Office

To/

The Secretary to the Commissioner
for the Government of the Territories of the Rajah of
Mysore

Sir/

I have the honor with reference to your letter № 521. dated 23d August 1842. and to the Extracts from a Dispatch from the Honorable Court of Directors relative to the projected pass into Canara from Munze had which accompanied it to request the favor of your ~~submitting~~ to the Commissioner the enclosed Memorandum on the Subject generally together with the accompanying documents Viz:

1st A Survey of 29. miles of traces including 4. miles of pass from Oopin-Mugadi in Canara to the Mysore Frontier, with an Estimate for making the same into a Carriage road of 6. yards broad with bridges &c Complete Amounting to Rupees 59,862-14-6-

2d A Survey of 12 miles of Pass Traced from the Canara Frontier to Marnhully the Head of the Ghaut with Estimate for making the same into a road of 5. yards wide Amounting to Rupees 33,278-3-11-

3d A Survey of 10. miles of trace from the Head of the Ghaut to Sucklaispoor the

of the Munzeerabad Talook with Estimate for
making the same into a road of 6 yards wide 32
Amounting to Rupees 18503-5-5-

2d In the event of its being determined to Authorize the construction of the proposed road - I trust it will be seen that I have endeavoured to supply the most minutely detailed information as to the nature of it, the season in which certain works should be undertaken, and the probable cost not only of each mile, but of every different part as presented to me on a careful inspection of the Constantly varying features of the line - This will I confidently hope secure the Government from loss, or disappointment and render it easy for the party who may be appointed to Superintend the works, to carry out the design satisfactorily.

3d If any discrepancy should appear to exist between the present and my former estimate, I respectfully beg that it may be remembered my first estimate was merely a rough one, that the line had not then been fixed upon, and that it provided for the assistance of both Sappers and Convicts -

4th The Yethan holla, or river, which falls from Munzerabad into Canara, and on the right bank of which the proposed line runs, is not navigable above its junction near Cudaba with the Comaradary River, which rises at Soobramunna near the Kistly Ghaut, or indeed afterwards

till its confluance with the Vaitaravutty River at Coopum. Mungadi which has its source, not at Munzeraabad, as I before supposed, but in the ghauts above Jemallabad. I am clearly therefore of opinion that it would be indispensible necessary to make the road to Coopum. Mungadi which or to Mullard 6. Indies short of it the traces would have to go from the Mysore Country, and to which boats from Mangalore have access.

5th In like manner it will be necessary to make the road as estimated for from the Head of the Pass to Sucklaispoor, all which is comprised within the Mulnaad or ghaut Country in which it has to pass over some rather difficult ground through Sundry cuums or Ancient barriers; to cross the Saddle of the Munzeraabad Hill, and from the left to the right bank of the Yethen Holla Ravine.

6th The time which has elapsed since attention was first attracted to the Munzeraabad ghaut, now 4½ years ago, has not been lost, as I have been enabled to make several traces in different directions, and with various inclinations, and thus to deliberately select the best line available. Though it was scarcely possible where nature has done so much for a road through the ghauts as the great ravine presents, to have marked out an indifferent line, the number of traces which have been laid off and measured for the ghaut alone

towards of 50. Miles has developed the capabilities of the ravine, and enabled me to avoid obstacles, to improve the general inclination to curtail the requisite scarping, & thus to reduce the estimate and facilitate the work.

No. 309. 418

To

The Secretary to the Commissioner
for the Government of the Territories
of the Rajah of Mysore.

Bangalore.

Sir,

I have the honor herewith to forward for submission to the Commissioner Copy of a Communication from Captain Greaw, containing his proposed Plan of Operations on the Munjerabad Chain for the ensuing season, which I would respectfully recommend to the sanction of the Commissioner -

The Expenditure on the work for the Current year, as proposed will be observed, not to exceed Rupees 16,000. -

In requesting the Commissioner's attention to the very Satisfactory state of the Chain Trace, as reported by

by Captain Green I would beg to observe that I consider it principally owing to the zeal and attention of Mr. Frederick Green under whose careful Superintendence the work has been heretofore Conducted.-

I would strongly recommend that the Commissioners still permit me to avail myself of Mr. Greens services, in Superintending the works in progress - His Knowledge of the Language, and practice in those parts, the Confidence the latter have in him and the experience he has gained, point him out as peculiarly fitted to conduct the future operations on the Bay Shore side, under the Control of the Officer whom it is proposed to place in Charge of the whole work, and in Consideration of the additional time which it will now be necessary for him to devote to the duty,

(and

and of his having suffered severely from fever brought on by exposure during his former services on the Ghaut, I would recommend to the liberal consideration of the Commissioner, that his allowance be increased from 70 to 100 Rupees a Month till the work is completed.—

I have the honor to be

No. 170

Mysore Maramut Office

To

The Superintendent

Astagram Division

Sir

I have the honor to suggest to you that as the rains are now nearly over on the Ghauts it will facilitate the labour of making the required cuttings on the Munzerabad Pass to proceed forthwith while the ground is still moist, and I should recommend therefore the several parties as before employed should be returned to the work by the 1st October Viz! 3 parties to the Pass, to which the road from Sucklaspoor has been already made, with a view to continue it in the direction of Mainhully; two parties between the Head of the Ghaut and the Kempa Kutt holay, all of which portion you will remember has been

been made 3 Yards wide in the clear; and is generally very passable. It is not therefore proposed that a further uniform widening throughout of this part of the line 82 miles in length should be undertaken in the coming season, but that the 2 parties should confine themselves to improving such portions here and there, (the terms principally, as are less convenient than others.

Two other parties to be employed like those above mentioned, but on the 32 miles of road between the Kempa Kull holay, and the Frontier (the average width of this is 2 yards, but there are portions or pattin points, which are less wide), and these obstructions especially should be early removed.

Conceive 2 parties may very profitably be employed on this part of the line during the whole season

season, for though it is but a few miles
in extent the stones are more troublesome
there, than in any other part.

By the above arrangement the
line from the Fort to the Head of
the Ghaut will have working on it
3 parties - Two parties will be on
the ghaut above the Kempa
Kulli nolay The cutting scarping
tree felling; and blasting will
therefore be proceeding from
October on three different
portions of the line at once, and

I deem it advisable that whatever is
undertaken from the Fort in the
direction of Manhully should now
comprise the final operation, and the
road there be finished off of the
full width intended, & with catch
= water drain above, where necessary,
Complete -

The Masonry work will also
now have to be commenced, and

this will naturally proceed from the Cusba downwards-

The ditches in front of the barriers, or Cundaturs, between the Fort and Cuck-kas from had better first be put in hand, for which the stones in the ruined Pettah wall of Mungerabad will be available. There are there the drains near Dawgaul and bridges to be Constructed over the Pethan holay, which 2 latter, the piers should think be done the ensuing season-

For making bricks and chunam, Collecting stones, &c., and afterwards for building the above works I would propose purchasing cart with Bullocks or Buffaloes &c. for these and other expences a Sum of Rupees 1000 monthly would I think be required in addition to the Rupees 1000 to be appropriated as before to the ensuing work &c.

other

other costly work, and beg you will obtain authority to that effect, from the Months of October, 8 Months till May, altogether a Sum of £6,000 Rupees.

This Amount with the assistance of any Prisoners, or other public establishments, the Commissioner can furnish, will I conceive be sufficient, and with reference to other works in the Mysore territory, in Contemplation, is as much as can be effected.

Should these arrangements be approved of a Copy of this Letter shall be furnished for the information of Lieutenant Walker, with whom, and Captain Cotton I shall put myself in Communication, on the Subject to which it refers.

I am happy to add that having examined the Roads as far as Sirandy 11 Miles beyond the Kempa Kudlu today I found it in good order, though

though of course a few Land Slips occurred during the Rains, which are now being cleared away, but that they are not of any consequence may be supposed from the fact of about 300 head of Cattle having in the course of yesterday already descended.—

The fallen earth would have had to be cut down hereafter, and as it is easily got rid of in its present state I regard each slip as so much assistance, or gain, to the width of the road.

The annexed list of tools will be required for the bridge and drain parties and I beg they may be furnished at your earliest convenience.—

of the Rajah of Mysore
Bangalore

Sir,

I have the honor here=
=with to forward the general
Maramut Estimate for the year
Shemoga amounting to Pondero
Pagl. 7,7,883-9-5½

Of this amount,
Cauvery Pagl. 14,904-4-14½ is for
the Muddoor Bridge and 9,719-3-
for the Munzerabad Ghaut

Deducting these two
sums the amount of the Estimate
is C. Pagl. 51,315-4-8¾ of which
14,861-2-12½ is on account of works
sanctioned last year but not
executed The actual amount
therefore of new works proposed

For

for Sanction this year is
36,454-1-12½. Viz.
Works of Irrigation 12,615-4-3½
Road, Buildings &c. 23,838-7-9.—
The amount of
the Estimate for last year was
C. Page 65,057-2-4.— The amount
Expended according to the Physa-
-tee accounts was (including
the works on the Munzerabad
Ghaut) 39,522-9-7½.—
The actual Expen-
-ditures in the Current year will
in all probability Scarcely Exceed
that sum.—

Pagodas 7883-9-5½

No. 100

Mysore Commissioner's Office

To

The Supdt. of Telegraphs

Sir -

I have the honor by desire of the Commissioner to acknowledge the receipt of your letter No. 31 of the 25th March last submitting a General Estimate of Government Works in your Division for the Current Year -

2 It appears that of the works mentioned in last Year there are still remaining unexecuted some to the extent of C. Rupees 14861-2-12¼, and those proposed for this Year amounting to C. Rupees 30462-5-5¼, exclusive of the Bridges at Shimsha and the Shanti Work at Channapatna both -

The Estimate originally proposed by the Supdt. of Government and sanctioned by the Government of India for this Shanti work C. Rupees 38377-6-4, of which expenditure a moiety - viz. C. Rupees 19188-8- was to be borne by the Mysore Government -

4. By the Accounts received from your Division this is observed that a sum of C. Rupees 15783-2-14¾ has been

Expended on the Ghaut
Work. The Amount
proposed to be laid out
this Year on the Ghaut
is C. Pagodas 9,19,-3-4½.
which Sum taken
Collectively would
make the total Expendi-
ture on the Ghaut and
Ghaut Roads C. Pagodas
93209--4¾.

Besides the Ghaut
Roads Works, supposed
to be the Road Work
from the Top of the Ghaut
from the above Aggregate
the actual outlay on
the Ghaut Roads
be C. Pagodas 20,30½-0-15¼
being an Increase of
C. Pagodas 9,3/3-8-13¼
over and above the
Amount of the Estimate
which Sum I have Selected
would fall to the Share
of the Mysore Government.

I am therefore desired
by the Commissioners to
request that you will
be so good as to obtain
and forward
the detailed Accounts,
shewing the actual
Amount Spent on the
Ghaut Work, and on
the Road Work from the
Top of the Ghaut to Luck-
-kapoor in (illegible)
(illegible) Division.

To

The Secretary to the Commissioner
for the Government of the Territories
of the Rajah of Mysore

Bangalore

Sir,

I have the honor herewith to forward
for the sanction of the Commissioner the
General Estimate for the Year Sowmyah
amounting in all to Canteroy Pagodas
50,306. 7. 11¼.

The Amount of the General Estimate
for last year was Canteroy Pagodas 30,122 7. 11.

The Amount expended was Canteroy
Pagodas 28,877. 6. 11.

The Amount included in this Years
Estimate under the head of works of
Irrigation is Canteroy Pagodas
14,863. 6. 9¼ of which C Pagodas 3,187. 2
is for works formerly sanctioned but not
executed, and 6 Pag.s 11,626. 6. 7¼ is for
fresh works including Annual Repairs.

The Amount under the head of Roads
& Bridges

Bridges &c. &c. is C. Pagodas 35,493.7.5. of which C. Pagodas 29,426.9.5. is for works formerly sanctioned but not completed including the Muddoor Bridge

The Amount required to be now sanctioned this Year, for Roads and Bridges, including Annual repairs is C. Pagodas 6,066.3.--

The Balance of C. Pagodas 29,426.9.5. sanctioned last year is included in the Sum of C. Pagodas 35,493.5.13¼ which was thought sufficient for the work of the Anuzravad Chank, but as nearly the whole of this Amount has already been expended on this work, a Sum of C. Pagodas 3,156.2.8. has been added to the Original Estimate.-

The Amount of the Estimates received by me for works of Irrigation were.-

From the Curnidars C. Pag. 15,764.2.--

Ditto &c. &c. Marcum 3590.5.4¾

Total C. Pagodas 22,355.3.4¾

(Of these Sums there are recommended for Sanction.-

Off
